"TO HELL WITH THE PUBLIC"

(By Associated Press)
CHICAGO, July 29.—A strike of 15,000 railway employees stopped all surface and elevated systems. The strike vote was carried with a show of hands early today in the car yards and auditorium, where the men went aside the representatives who attempted to explain their compromise with the company, and boasted one of their own number to the platform to put over the strike vote. The meeting proclaimed in favor of 85 cents per hour, an eight-hour day with six hours on Sunday and a six-day week.

MAY NOT LEAVE FOR TWO WEEKS

(By Associated Press)
WASHINGTON, July 29.—The president may not leave Washington for a tour of the country until August 15, because of the excessive heat. He probably will confer with cabinet members today concerning the advisability of having the Pacific fleet await his arrival before entering San Francisco.

WILL PAY COLOMBIA FOR PANAMA TERRITORY

(By Associated Press)
WASHINGTON, July 29.—The senate foreign relations committee has ordered the Colombian treaty, which has been pending for years, favorably reported. A motion to reduce from \$25,000,000 to \$15,000,000 the amount payable to Colombia for partition of Panama was defeated by 12 to 2.

ANARCHY IN CHICAGO HEAVY LOSS OF LIFE

(By Associated Press)
CHICAGO, July 29.—The police list of race riot deaths totalled twenty-four early today. The names of three negroes and one white were added to this list during the morning. Hundreds were wounded. Disorders spread from the black belt, the previous center, to the north side, where few negroes live. Disturbances occurred downtown and in the stock yards sections where there was a renewal of rioting today. Four thousand fully equipped soldiers stood ready to quell rioting. They were mobilized last night when bloody fighting was renewed. A hundred thousand negroes, and an equal number of whites either fought in the streets, alleys or cowered in their homes while shots rang out. Mounted policemen patrolled the boulevards and patrol wagons collected prisoners, dead and wounded. Women and children screamed. Men used cut-throats, knives and fists. Both races deliberately armed themselves last night. After dark the fighting became fiercer. The carmen's strike will aid in the spread of the riots. Streets ordinarily deserted were crowded with men and boys walking which afforded an opportunity for racial quarrels.

Back of the stoning and drowning of the negro boy on the lake front Sunday which was the immediate cause of the disturbances is the resentment of the whites over the negro invasion of a large territory on the south side formerly constituting the fine residence quarters. Property has decreased in value. Whites had emigrated to other parts of the city by thousands but many others clung to their homes while the streets and one of the large parks became thronged with negroes.

Looters and incendiaries became active last night. A number of stores were sacked. Vandals of both races marred the besmirched habitations of their opponents. The affrays owed their beginning about equally to the

As one result of the determination of the permanency of the Divide Extension by developments on the 100 foot level of the Caldwell shaft a large block of the stock of the company was taken over by Sherwood Aldrich and associates, representing Hayden, Stone Co. and D. C. Jackling, the copper magnates of the United States. The stock absorbed by these interests does not transfer control and it is known that the Nevada and Eastern interests are all working in harmony with the intention of developing the property in what they believe will prove one of the most wonderful mines in the country. The price paid for this stock was \$3.25 a share for 40,000 shares of treasury and a block of personal holdings the total of which is not mentioned.

ALBANY DIVIDE DOING STUNTS

The Albany Divide Mining company's stock was listed on the Boston Curb Exchange early in May by John E. Allen & Co. It started off at 90 cents and soon advanced to the price of \$1.50 when several Boston curb brokers began to short it. The price continued to advance until finally the Boston Curb Exchange held a meeting and decided it was time for a settlement. After some squirming and squealing, the shorters made a settlement when the stock was around \$6 or \$7. Immediately some of the big ones shorted again and it has since advanced to \$23 causing the bears to let out a real howl.

Allen and company are also handling the Hecla Divide which started at 60 cents and is now selling at 90 cents and up to date the bears have not thought well of shorting it.

Representatives of the Ingersoll-Rand company and the Sullivan Machinery company are on the ground now and will submit bids at once for drilling three 300-foot holes with a core drill. This work will be watched with great interest by the operators of the Divide district. The Albany and the Hecla adjoin the Eureka Divide.

Each of these properties have a shaft down over 50 feet and are well equipped to continue to sink to the 500-foot level.

DESTROYER BUILT IN JUST SEVENTY DAYS

(By Associated Press)
SAN FRANCISCO, July 29.—The United States navy destroyer Ward, part of the new Pacific fleet, has the distinction of having broken all construction records for this class of vessel.

The Ward was built at the Mare Island navy yard during the war rush for new ships. It took but seventy days from the laying of the keel to placing the Ward in commission. The destroyer was launched 17 1/2 days after the keel was laid. The record, it was said, was achieved by careful routing of materials and handling of labor.

SENATE INVESTIGATES PRICE OF FUEL OIL

(By Associated Press)
WASHINGTON, July 29.—The senate adopted the Poindexter resolution authorizing the federal trade commission to investigate recent increases in the market price of fuel oil in the United States, especially on the Pacific coast.

The option on this stock was given some weeks ago before opening the orebody on the 100 level and was based on the assumption that the ledge would be found in place at depth without any impairment of its richness. The faith of the buyers was justified by the findings on the 100 level where the disclosures were even better than anticipated, resulting in placing the mine at once in the shipping class. The production is at the rate of 20 tons a day which realizes from \$60 to \$80 a ton making this the highest grade ore that has ever been mined in Nevada.

The same interests with Wingfield and Brougher already control the Victory, Belcher and Belcher Extension mines and the latest purchase demonstrates the infinite faith these men have in the Divide district.

DEEP WORKINGS LOOKING BETTER

Several properties reported improved physical conditions this morning which confirms the report that before the first of September, twenty-three properties will be engaged in crosscutting. The Silver Divide is credited with a substantial stringer in the shaft where water has been showing for some time. Victory is cutting a station with a change in formation which augurs well for later development. The Revere crosscut yesterday opened an east and west vein that looks like the stuff that runs \$30 to \$40 in other properties but from which no assays had been received up to this afternoon. The future is stronger than ever but future development will not be settled until the return of George Reading, the manager, who is expected home from the Texas oil fields Thursday morning.

On the Myra a change is coming in in the bottom of the shaft at 140 feet but the hole will be continued to the 200 foot point where a cross-cut will be run so as to reach a vein that was cut at 60 feet.

The change is from andesite and porphyry which stayed in the shaft to 130 feet when the change came in with a more porous formation. The Myra is operating with two shifts and has one of the most complete plants in the district with a nice surface equipment of houses brought over from Goldfield.

FLINN CAUGHT IN THE SAND

Mr. and Mrs. Thomas J. Flinn with their house guests, returned to Tonopah last evening about 8:30, safe and sound after their experience on the Cloverdale road. Leaving here Sunday morning everything went well until about 11 miles from Cloverdale when the machine ran into heavy sand through which it was impossible to make any headway. After struggling until 3 o'clock in the afternoon and failing to extricate themselves the party gave it up as a hopeless task and proceeded to walk back to Cloverdale, where they arrived at 9 o'clock and remained until the following morning when a team was procured and the machine rescued after which they returned home without any further trouble. The relief car sent after them was not seen.

FRENCH AND BELGIANS FOR ARMY OF OCCUPATION

(By Associated Press)
WASHINGTON, July 29.—Secretary Baker told the house military committee that the allied army of occupation in Germany, beginning in September, will be largely French and Belgians.

BIG SWIMMING ON LABOR DAY

(By Associated Press)
SAN DIEGO, July 29.—An important swimming meet will be held in San Diego on Labor Day under the auspices of the San Diego Rowing Club, which now is making preliminary arrangements.

At this meet the Pacific coast indoor championships will be decided. Though officially it will be known as an indoor meet, the races will be swum in the bay. This arrangement was allowed in 1917, when the same championships were held here.

The best swimmers of the coast are expected to enter in these events and there will be entrants from Piedmont, Olympic, Los Angeles Athletic Club, Multnomah Athletic Club, San Diego Rowing and other aquatic clubs on this coast. The program will include events for women and Frances Schroth, Aileen Allen, Dorothy Burns and other expert women swimmers will be entered.

ELKS SHIRTWAIST DANCE WILL BE HELD THURSDAY

The second of the series of informal dances given under the auspices of the Tonopah Elks will be held Thursday evening at Elks Home where the cooling interior always proves so refreshing these warm evenings. Good music will be provided. Invitations may be had from any member of the local lodge.

Treaty With France Sent to the Senate

(By Associated Press)
WASHINGTON, July 29.—President Wilson transmitted the special treaty with France to the senate with a message expressing the "earnest hope that this will meet with your cordial approval and receive an early ratification along with the treaty with Germany."

The submission followed Republican charges that the President violated the articles of the document in failing to present the pact with the German treaty sent to the capitol by a messenger. The president's message said the "object of the treaty is to provide immediate military assistance in case of any unprovoked aggression against France by Germany without waiting for the advice of the council of the league of nations that such action be taken."

The message said the pact would remain effective only until the council of the league shall agree that provisions of the covenant and the

WAS ON SAN DIEGO WHEN SHE WENT DOWN

(By Associated Press)
SAN FRANCISCO, July 19.—Captain Harley H. Christy, commander of the super dreadnaught, Wyoming, one of the "big four" of the new Pacific fleet, was commander of the cruiser San Diego when she was sunk July 19, 1918, near Fire Island, off the New York coast by striking a mine, supposed to have been set adrift by a German submarine. He has been in the navy many years and is a brother of Howard Chandler Christy, the widely known illustrator.

TERRITORIAL RIGHTS OF BELGIUM AND HOLLAND

(By Associated Press)
PARIS, July 29.—The initial meeting held by the interallied commission to revise the treaty of 1839 involving territorial and other questions affecting Belgium and Holland was held today.

CRUELITIES PRACTISED IN PRISON

(By Associated Press)
NEW YORK, July 29.—Lieut. Frank Smith told the house subcommittee that Major General Strong and Colonel Grinstead were responsible for the cruel treatment of soldiers at the prison farm number 2 near Paris. He testified that Grinstead said Strong ordered ruthless severity.

Smith denied that prisoners at the farm he commanded had ever been beaten. The worst conditions resulted from shortage of food and fuel. Many men slept in mud on straw. He said, while in charge of the farm he was directly responsible to Grinstead who visited the farm three or four times a week.

When Smith was taken before a courtmartial on charges of cruelty he was sentenced to three years' imprisonment after the sentence was reduced to eighteen months. He was brought from France recently and taken to the disciplinary barracks at Fort Jay, Governor's Island.

(By Associated Press)
SAN FRANCISCO, July 29.—General Strong declared he was a "hundred miles from the farm and had absolutely nothing to do with the treatment of prisoners."

BUTLER THEATRE

TODAY
GLADYS BROCKWELL
—in—
"The Call of the Soul"

A story of sex inequality and the woman's penalty. Shows how a woman is made to pay. Also Ford Educational Weekly and Mutt and Jeff comedy.
